Inventory Management

Guaranteed Availability, Reduce or Eliminate Inventory Costs, Increase Buying Power, Standardize Quality, & Streamline your Entire Purchasing Process…

Alloy Fasteners’ account managers can tailor an inventory management program to suit your company’s specific needs.

Your inventory management program can include the following service options:

- Blanket Orders with Scheduled Releases
- Bin Stocking
- Customized Report Feedback
- Bar Coding
- Consigned Inventory Programs
- Screw Kit Assembly
- Product Consolidation & Streamlining
- Flexible Payment Terms

- Nationwide Warehousing & Distribution
- In-House Domestic Manufacturer
- Extensive Inventory of Standard & Special Items
- Direct Importer
- Allflex™
- Allochrome 1500+™
- In-House Precision Machine Shop with Tool & Die Capability
- ISO 9001 Certified

www.alloyfasteners.com
Marine:

Over several decades of service to the marine industry, Alloy has established long relationships with boat manufacturers including sail, power, canoe, kayak, etc. and the original equipment suppliers of marine related products. The result of these partnerships has expanded our knowledge of the various requirements of the industry.

As a result, in addition to a broad range of standard fasteners, Alloy supplies industry specific items including Cable ties, rivets, custom machine parts, drill bits, Teks (self-drilling), hose clamps, pipe fittings, studs, staples, and bow eyes. We also offer neoprene washers and neoprene backed stainless washers, stainless shackles, winches, thimbles, toggle bolts, Rotomold fasteners, 2 loop lanyards, and recess bumpers.

As manufacturers strive to improve the value of their product, Alloy has supported them by improving available fastener options. This includes an attention to materials and finishes.

Materials include stainless in 316, 18-8 (302 and 304), brass, silicon bronze, and monel. Also, as a result of testing and education, Alloy offers coatings that provide greater corrosion resistance and color matching for detailed finish work. Finishes include chrome plating, black xylan, black oxide and painted heads.

Alloy provides extensive, customized bin stock services to marine accounts across the country, including the IBBI and UMMA buying groups. (Please see our testimonials)

Curtainwall:

Alloy’s experience with curtainwall illustrates another industry where Alloy has been at the forefront.

During the Malaysian Towers project, Alloy developed a specialty screw that has since become the industry standard for attaching the aluminum panels to the frame.

In order to more effectively service the unique demands of this industry, our manufacturing arm produces various specialty screws and custom machine parts with a minimum two-week lead time.

We are also a Master Distributor for Dril-Flex and one of the top two distributors for Elco Textron. We routinely stock and supply industry specific fasteners such as: Type B, F, 23, Dril-Flex, custom AB, and C; hex and hex washer heads; tap tites; wedge anchors and threaded rod. (Please see our “Projects” section)

Window & Door:

We currently offer some of the top Regional and National manufacturers extensive bin-stock programs, customized to their specific needs. As a result, Alloy has a long, proven record of ensuring a smooth steady supply to manufacturing lines, eliminating shutdowns due to a fastener shortage.

In addition, we provide bar coding, installation screw kits, waste reduction initiatives, blanket pricing for cost stability, and short-term prototype manufacturing.

Industry specific products include: coated screws, exact color match painted screws, Type F, Teks (self-drilling), leader points, special shoulder screws, vinyl holding screws, Type 17 cutting point, and mullion fasteners. Both 410 and 18-8 stainless are available.

Outdoor Furniture:

As a direct importer of stainless (and other) fasteners, Alloy routinely stocks the standard hex caps, carriage bolts and nuts common to the industry. Industry specific products include full body screws and black xylan coatings.
Fencing:
The commercial and residential fence industry is on the rise, and product options are quickly increasing. Alloy has worked with industry leaders to make available specific fastener requirements such as: standard polyurethane head paint; color matching to all extruded vinyl fence, deck, railing and aluminum fence manufacturers; special head paints for stainless to resist bleeding in corrosive coastal environments; screw kits and special packaging services. Coupled with our extensive inventory of standard fasteners, Alloy truly can offer “one-stop shopping”.

Playground Equipment ~ Recreation ~ Waterslides:
With extensive knowledge and experience in these industries, Alloy manufactures specials to comply with ADA, ASTM, CSA, CPSC, and DIN standards as they relate to recreational safety guidelines.

We package single SKU’s to facilitate in-house order fulfillment, and multiple SKU’s to facilitate knockdown and field installation as part of a more comprehensive inventory management program. Other services include bin stocking, dock to stock quality status, and bar coding.

Industry specific products include: 6 lobe button socket cap, screws with a locking patch, timber spikes, 18-8 stainless and hot dip galvanized parts, anti-seize coatings, wedge anchors in 18-8, rotation molding inserts, wire forms including U-bolts, tamperproof fasteners, T-nuts, barrel nuts, nylon bushings, weld nuts, and custom parts to print.

Pool & Spa:
Alloy has had the good fortune to supply some of the world’s largest manufacturers of Pool, Spa, and related products. As a result of those partnerships, we are well versed in the various industry needs.

Along with a wide variety of standards (i.e. sheet metal and machine screws, washers, nuts, hex caps, etc.), we routinely stock industry specific items such as: brass inserts, custom basket handles and other wire forms, CNC & screw machine parts, vibratite patched items, left hand thread, painted heads, o-rings, double end studs in brass and stainless, brass air bleeder valves, brass material parts with bright nickel coating, electrical parts, wire management products, hose clamps, electrical parts, and special parts to print / spec.

Bin stock and item consolidation programs are in place and available.

Vessels & Storage Tanks:
Our experience in this industry includes the food and pharmaceutical arenas for the containment of liquids and related materials in appropriate tanks / vessels.

Alloy supplies non-nuclear material that conforms to ASME and ASTM standards including but not limited to: B8 and B7 material, exotics (i.e. Hasteloy and Monel for example). These materials take the form of heavy hex bolts, studs, U-bolts, etc. All certified and 100% traceable.

ALLOY FASTENERS also services the food, beverage, chemical, pharmaceutical, defense, aerospace, biotechnology, paper, pure water, waste water industries, wind generated energy and solar power…

as well as manufacturers of appliances, heat transfer products, decking, shower doors and more…
Alloy is a Master Distributor for...

- Etc’ Construction Products
  - Drill-Flex®, Tek (self-drilling) screws, Crete-Flex®, Tap-Con®
- Advel Cherry Textron® - Cherry® rivets
- Gesipa Fasteners Mfg.® - rivets
- Celus® Mfg. Inc.® - Celus® rivets
- ITW Buildex® - drilling fasteners
- All-States Inc.® - cable ties
- ACT Fastening Solutions® - cable ties
- Fasnap® Corporation
- DOT®-Scoville Fasteners® - snaps, buckles, etc.
- Nord-Lock® - bolt securing systems, patented locking washers
- Emhart Fastening Technologies
  - Dodge® - inserts
  - Heli-Coil® - inserts, springs
  - POP® - rivets

Alloy is also a Distributor for...

- Allflex™
- Allochrome 1500+™
- Alcoa Fastening Systems
  - Marson® rivets, Recoil® inserts,
- Ideal/Tridon® - hose clamps
- Bay State® - cable ties

AllFlex® stainless steel thread cutting and self-tapping fasteners are made in the U.S.A. and have a proven success record in architectural applications around the world. They are the ideal fastening solution for curtain walls, windows, doors and other applications that include a dissimilar metal, such as aluminum. Stainless steel coupled with the Stalgard® GB coating gives AllFlex® superior protection in the harshest environments.

Stainless steel offers long-term corrosion resistance in aggressive environments such as coastal areas and other applications where moisture may accumulate. However, stainless steel is not always compatible when fastened to a different type of metal which may cause galvanic corrosion. To prevent this, each AllFlex® fastener is coated with Stalgard® GB (Galvanic Barrier) finish. Stalgard® GB provides far greater galvanic protection for aluminum components than plain finish 300 series stainless steel fasteners.

**Combats Two Types of Corrosion**

**Uniform Corrosion** is the general breakdown of a metal into an oxide of the metal or other corrosion product. The most common type of uniform corrosion is the visible formation of red rust on steel. 300 series stainless steel provides excellent resistance to uniform corrosion.

**Galvanic Corrosion** occurs when dissimilar metals are joined in the presence of an electrolyte like water. One metal will become the anode, or sacrificial component, and the other metal will be the cathode, or the metal that does not corrode. Stalgard® GB coating provides a galvanic barrier to protect aluminum from becoming sacrificial to the stainless fastener. Preserving the integrity of both the fastener and the application materials help prevent joint failure and retain high aesthetic quality.

**Benefits**

- Type B & AB Self Tapping screws, and Type F & 23 Thread Cutting screws, in aluminum components, eliminating tapping operations allowing for a faster installation
- Stalgard® GB coating prevents galvanic reaction between stainless steel fasteners and aluminum components
- Stainless steel offers long term corrosion resistance in aggressive environments, including coastal areas
- Combination of features retains joint and material integrity to help ensure long-term quality

**Applications:**

- Curtain walls, including aluminum panels
- Windows and doors
- Buildings in a marine environment
- Structures in pool and spa areas
- Hurricane protection systems
- Explosion-control systems

**Specifications:**

- **Materials** – 302ss, 304ss, 316ss, 410ss, 430ss
- **Diameters** – “8-1/2”
- **Head Styles and Drive Systems** – Hex Washer, Phillips Pan, Phillips Flat, Phillips Flat Undercut, etc. (see chart)
- **Thread and Point Styles** – Type F & 23 Thread Cutting, Type AB & B Self Tapping, etc. (see chart)
- **Finish** – Stalgard® GB (Galvanic Barrier) coating

**Specials available upon request**
Introducing

AlloChrome 1500+™

AlloChrome 1500+™ is a New Superior Chrome Substitute that lasts Over 1500 Hours in a Salt Spray Chamber! This far exceeds the typical 96-250 hours that is on the market today.

Virtually Eliminate “Bleeding” issues as seen on the above photos for a minimal cost! This is a Huge Break Through in Corrosion Resistance showing you that Alloy Fasteners continues to outperform the competition!

Please call or visit our website for more detailed information including independent lab test results at www.alloyfasteners.com.
Click on AlloChrome 1500+.
Samples and pricing available upon request!

Both manufacturing and distribution divisions are certified to the ISO 9001 quality management system. This standard provides the guidelines for performance improvement tools we have in place that ultimately generate value to the customer. The 2008 revision of the ISO 9000 standard focuses on continuous improvement through a process-based approach. Strict quality procedures are in place assuring the integrity of product to the highest quality standard possible, with traceability back to the original raw material, available to our customers upon request.

RoHS Compliance:

Working with our world wide partners to protect the environment, we provide and certify a large part of our inventory to RoHS demands (European Directive 2002/95/EC). RoHS (Restriction of Hazardous Substances) is a directive requiring all electrical or electronic equipment sold after 2006 satisfy strict regulations limiting the presence of several hazardous materials in products so as to be virtually contaminant free if/when disposed of. This regulation has been adopted by China and most European countries, and the United States is currently working on similar legislation for domestic restrictions as well.
